

ABOUT US:

Ascendance Wireless is a global manufacturer of wireless networks with a primary focus on the physical security, video surveillance, access control industries. As a result, we have acquired unmatched expertise in the security industry. Whether you're a reseller or a national account, we provide cost-effective, intelligent wireless systems and professional services for all types of applications and customers.

Here are a few of the reasons to select Ascendance Wireless as your wireless partner

PEOPLE:

The Ascendance Wireless founder and senior executive team are comprised of experienced, successful serial entrepreneurs within the Wireless, Telecommunications, Voice/Data, and WISP markets. As founders of several startup companies, our team clearly understands and appreciates the day to day business challenges and complexities surrounding the startup, development, growth, and sustainability of a successful and profitable technology business.

PARTNERSHIP:

Our reseller oriented approach is based upon open minded communication and the willingness to share our past business and technology experiences in order to help you achieve greater project success. Our overall philosophy is centered on being customer-focused to better understand your specific needs. We are committed to a business partnership where we earn your trust and become your primary wireless partner, who provides you with unparalleled information, products, professional services and customer support.

SIMPLICITY:

Simple to design, deploy and support.

RELIABILITY:

Carrier-class reliability ensures non-stop security and performance. Extremely durable hardware that is deployable in the harshest environments. All products include a 1 year warranty.

COST-EFFECTIVE:

Our products are cost-effective from a simple Point-to-Point link up through large scale Point-to-MultiPoint networks.

FIT:

Ascendance Wireless meets the requirements of 90% of all wireless networking projects. Deploys virtually anywhere – rugged terrain, bodies of water, rural and remote areas.

UNIQUE PRODUCT ADVANTAGES:

Built-in Hardened PoE Switch power support for IP cameras and other PoE devices, Up to 5 IP cameras/devices can be directly connected to unit, High capacity, bi-directional broadband wireless with up to 40MBPS TCP/IP data throughput, World-Class Network Management Software, Indoor & Outdoor environments, Up to 2 radio links per IAP system, Up to 4 radio links per WPLT system, Factory "Pre-Programmed Matched Systems" (Pairs), QoS Packet Prioritization Video/Voice/Data prioritization and Advanced Traffic Policies, Universal hardware placement and Extended temperature ranges.

EXPANDIBILITY:

You can add additional devices (Camera's, gate/door access control, VoIP/Intercom, etc) and wireless systems to expand the network as needed while retaining your original investment.

SUPPORT:

Most orders will ship within 24 to 48 hours from our distribution partners and if required, within 5 days direct from manufacturer.

DELIVERY:

Pre-sale; in-field sales support, sales engineering, system and network design, project quoting and network drawings. Post-sale; pre-programming and configuration, commissioning, testing, factory product labeling, network documentation, onsite and remote deployment and maintenance assistance, and onsite and remote training.

WHERE WE ARE NOW:

We offer industry leading, reseller friendly, cost-effective, technologically advanced, and flexible wireless products and services.

WHERE WE ARE GOING:

We are constantly identifying and developing new technologies and strategic marketing alliances in order to address a larger segment of the security market to fill existing gaps with relevant and innovative solutions.
